

Blades cause buffeting.

The blades on conventional fans cause unpleasant buffeting because they chop the air before it hits you.

Fast-spinning blades.

Conventional fans have fast-spinning blades that have to be guarded by a safety grille.

Safe.

Awkward to clean. The Dyson Air Multiplier™ Conventional fans are fan has no blades. It's 🚀 appliances of the dismantle Australia's largest online appliance retailer

Easy to clean.

The Dyson Air Multiplier™ fan has no awkward grilles or blades.

Limited settings.

Conventional fans only have 3 or 4 settings and one of those is 'off '. You wish you could adjust it a little.

Dimmer-switch.

The Dyson Air Multiplier™ fan has dimmer-switch control to precisely adjust airflow power. Awkward to adjust. Conventional fans are top heavy and awkward to appliances of the appliance of the application of the appli

Touch-tilt.

The Dyson Air Multiplier[™] fan pivots on its own centre of gravity, staying put without clamping.

How it works.

Air Multiplier[™] technology.

Air is accelerated through an annular aperture. This creates a jet of air that passes over an airfoil-shaped ramp, channelling its direction. Surrounding air is drawn into the airflow, amplifying it 15 times (this is called inducement and entrainment).

dyson air multiplier

No blades. No buffeting.

Mixed flow impeller A combination of the technologies used in turbochargers and jet engines generates powerful airflow.

Brushless motor

Energy-efficient. Variable power rather than the limited settings on conventional motors.

Air inlet

Up to 20 litres of air drawn in per second, generating primary airflow.

Easy to assemble Just push-fit loop amplifier to base, then twist.

> On/off control LED for use in the dark.

Airflow control Dimmer-switch control. Precisely adjusts airflow power.

airflow velocity and volume.

Safe

No fast-spinning blades.

Easy to clean

No awkward grilles

or blades.

Generates maximum

16° airfoil-shaped ramp

1mm annular aperture Air is forced out to create the annular jet.

> 10mm airflow projector Directs more air towards you by focusing its exit angle.

Low centre of gravity Base-mounted motor. Not top heavy and unstable like conventional fans.

Touch-tilt Pivots on its own centre of gravity, staying put without clamping.

Oscillation control Independent motor drives smooth 90° oscillation.
