BREVILLE RECOMMENDS SAFETY FIRST

At Breville we are very safety conscious. We design and manufacture consumer products with the safety of you, our valued customer, foremost in mind. In addition we ask that you exercise a degree of care when using any electrical appliance and adhere to the following precautions.

IMPORTANT SAFEGUARDS

READ ALL INSTRUCTIONS BEFORE USE AND SAVE FOR FUTURE REFERENCE

- Remove and safely discard any packaging material and promotional labels before using the Breville Fast Slow Cooker for the first time.
- To eliminate a choking hazard for young children, remove and safely discard the protective cover fitted to the power plug of this appliance.
- Do not immerse appliance base, power cord or plug in water or any other liquid.
- Always insert the connector end of the power cord into appliance inlet inserting power plug into power outlet and switching on appliance. Ensure the appliance inlet is completely dry before inserting the connector end of the power cord.
- This appliance cooks under pressure. Improper use may result in injury. When using this appliance for any function other than sauté, ensure the lid is properly assembled and locked into position before use.
- Do not place Breville Fast Slow Cooker near the edge of a bench or table during operation. Ensure that the surface is level, clean and free of water and other substances.
- Do not operate Breville Fast Slow Cooker on a sink drain board.
- Do not move Breville Fast Slow Cooker when in use.
- Do not place this appliance on or near a hot gas burner, electric element or where it could touch a heated oven. Position Breville Fast Slow Cooker at a minimum distance of 20cm away from walls and provide adequate space above and all sides for air circulation.
- Keep the Breville Fast Slow Cooker clear of walls, curtains and other heat or steam sensitive materials.
- Do not touch hot surfaces. Use handles on the sides of appliance and on lid. Use the button to release steam pressure.
- Always ensure Breville Fast Slow Cooker is properly assembled before use. Follow the instructions provided in this book.
- Before placing removable cooking bowl into stainless steel base ensure base of bowl and base of appliance is dry by wiping with a dry soft cloth.
- Do not place food or liquid directly into stainless steel base. Only removable cooking bowl is designed to contain food or liquid.
- Never operate Breville Fast Slow Cooker without food and liquid in the removable cooking bowl. Ensure removable cooking bowl is not below the ‘2’ level mark or 1/3 full of food and/or liquid not filled over 2/3 full before switching on appliance. Always follow the maximum and minimum quantities of liquid stated in instructions and recipes.
**BREVILLE RECOMMENDS SAFETY FIRST**

- Do not exceed maximum fill level. Some foods expand during pressure cooking such as rice, dried vegetables, do not fill removable cooking pan over ½ full. Over filling may cause a risk of clogging pressure release valve and pressure indicator valve and develop excess pressure.
- Do not use a damaged removable cooking bowl. Replace before using.
- Ensure that lid is properly closed before operating. (see step 4 page 19-20)
- Do not use Breville Fast Slow Cooker for other than it’s intended use. Do not attempt to operate Breville Fast Slow Cooker by any method other than those described in this book.
- Some foods to avoid when pressure cooking are; apple sauce, cranberries, pearl barley, oatmeal and other cereals, noodles and pasta, and rhubarb; these foods can foam, froth and splatter and clog the pressure release valve and pressure indicator valve.
- Removable cooking bowl can be extremely heavy when full of ingredients, care should be taken when lifting from Breville Fast Slow Cooker base.
- Always check pressure release valve and pressure indicator valve for clogging before use and clean if necessary. Check to make sure the pressure indicator rod moves freely from under the lid.
- Extreme caution must be used when appliance contains hot food and liquids and/or is under pressure. Improper use may result in injury. When using this appliance for any function except sauté, make sure the lid is properly locked before operating.
- Do not use the lid handle to carry appliance when in use and after use.
- Do not attempt to open Breville Fast Slow Cooker lid after pressure cooking until all internal pressure has been released and is slightly cooled. If the lid will not turn to unlock, this indicates that appliance is still under pressure – do not force lid open. Any pressure remaining can be hazardous. See operating instructions for “steam release” directions in this instruction book. (see step 10-12 page 20)
- Always ensure that removable cooking bowl has cooled sufficiently before handling and use oven mitts as a precaution.
- The Breville Fast Slow Cooker is not intended to be operated by means of an external timer or separate remote control system.
- Do not place anything, other than lid, on top of Breville Fast Slow Cooker when assembled, when in use and when stored.
- Do not adjust the “Pressure Regulator” whilst in use.
- Use only recommended “Steam Release” to depressurize cooker after use. (see step 10-12 page 20)
- Do not use this appliance cooker for deep frying.
- Do not sauté or shallow fry under pressure.
- Always ensure there is enough liquid in removable cooking bowl when steaming. At least 4 cups (1 litre) of liquid is required when cooking under pressure or steaming.
- Always ensure START/CANCEL has been pressed to CANCEL, then turn the power off at the power outlet and remove power plug from the power outlet before attempting to move the appliance, when appliance is not in use and before cleaning and storing.
BREVILLE RECOMMENDS SAFETY FIRST

- To protect against electric shock, do not immerse Breville Fast Slow Cooker base, power base, power cord or power plug in water or allow moisture to come in contact with these parts.
- Keep Breville Fast Slow Cooker clean. Follow the cleaning instructions provided in this book. (see page 38)

IMPORTANT SAFEGUARDS FOR ALL ELECTRICAL APPLIANCES

- Fully unwind the power cord before use.
- Do not let the power cord hang over the edge of a bench or table, touch hot surfaces or become knotted.
- To protect against electric shock do not immerse the power cord, power plug or appliance in water or any other liquid.
- The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- It is recommended to regularly inspect the appliance. To avoid a hazard do not use the appliance if power cord, power plug or appliance becomes damaged in any way. Return the entire appliance to the nearest authorised Breville Service Centre for examination and/or repair.
- Any maintenance other than cleaning should be performed at an authorised Breville Service Centre.

• This appliance is for household use only. Do not use this appliance for anything other than its intended use. Do not use in moving vehicles or boats. Do not use outdoors. Misuse may cause injury.
• The installation of a residual current device (safety switch) is recommended to provide additional safety protection when using electrical appliances. It is advisable that a safety switch with a rated residual operating current not exceeding 30mA be installed in the electrical circuit supplying the appliance. See your electrician for professional advice.

BEFORE FIRST USE

of your Breville Fast Slow Cooker™
BEFORE FIRST USE

PREPARING THE FAST SLOW COOKER FOR USE

1. Before first use, remove all promotional labels and packing materials and discard in a safe place to avoid a choking hazard.

2. Remove the lid by taking hold of the handle, turning it counter clockwise and lifting the lid up and off the appliance.

3. Wash the removable cooking bowl, stainless steel lid and silicone rubber gasket in hot, soapy water, rinse and dry thoroughly. Wipe the inside and the outside of the stainless steel base with a soft, damp cloth, then dry thoroughly.

4. Attach the clean silicone rubber gasket securely back into the gasket holder using the indicated arrows as a guide. Ensure that the arrows is facing up when inserting into the lid.

5. Clean and dry the bottom of the removable cooking bowl as well as the temperature sensor, making sure there are no unwanted materials on the surface. The removable cooking bowl must sit flat on the temperature sensor to ensure proper contact.

⚠️ Warning: If the silicone rubber gasket is not correctly fitted back into the gasket holder, the lid will not close and it will result appliance malfunction and stop the pressure cooker from operating.
BEFORE FIRST USE

DO’S

• Always thaw frozen meat and poultry before cooking.

• Use dry oven mitts when lifting the removable bowl after cooking.

• Always store Breville Fast Slow Cooker in a cool, dry place.

DON'T’S

• Do not operate any of settings without removable cooking bowl in position.

• Do not cook with frozen meats or poultry.

• Do not remove stainless steel lid when using the Slow Cook setting unnecessarily as this will result in major heat loss.

NEVER

• Place water or other liquids into the stainless steel base of Breville Fast Slow Cooker.

• Immerse base, cord, or plug of Breville Fast Slow Cooker in water or any other liquid.

• Touch hot surfaces with bare hands.

• Deep fry in Breville Fast Slow Cooker.

• To prevent aromas, moulds and odours, never store your Breville Fast Slow Cooker closed with lid locked in place. Follow the care and cleaning guidelines on page 36. Pack and store with lid resting upside down on removable cooking bowl in a well ventilated area.
HINTS AND TIPS BEFORE PRESSURE COOKING & SLOW COOKING

PREPARING MEAT AND POULTRY

Select cuts of meat suitable for slow cooking and pressure cooking and trim meat or poultry of any visible fat and excess skin. Excess fat will result in extra liquid being formed as it melts and cooks.

For casserole type recipes, cut meat into cubes, approximately 3-5cm.

Pressure Cooking and Slow cooking allows less tender cuts of meat to be used. Such as beef cheeks, pork shoulder, and veal shanks. The bones can be left on meat or poultry and this will help to keep meat tender during cooking and enrich flavour of finished dish.

<td>Diced leg, shoulder/forequarter chops and steaks, neck chops, knuckle (osso bucco)</td>
<td>Leg steaks, diced belly, Diced shoulder, Boneless loin chops</td>
</tr>
</tbody>

PREPARING VEGETABLES

Vegetables should be cut into even-sized pieces to ensure more even cooking.

Frozen vegetables must be thawed before adding to other foods when cooking in the Breville Fast Slow Cooker

Peel vegetables when appropriate. Keep in mind that hard vegetables like potatoes and beetroots hold shape better when peel is left intact.

PREPARING DRIED PULSES (BEANS AND PEAS)

If time permits, soak pulses in ample water and cover for 6 to 8 hours or overnight. After soaking, drain and rinse. Place pulses in Breville Fast Slow Cooker and cover with water or stock at least 5cm above the level of pulses.

Onions, bay leaves and garlic can be added to flavour the pulses and broth. Do not add salt. Adding salt at the beginning may harden the skins of beans and peas and prevent proper cooking.

IMPORTANT

- Softer Pulses such as; mung beans, lima beans and butter beans are best cooked using LOW AND MEDIUM pressure
- When PRESSURE COOKING AND SLOW COOKING the resulting juices and liquids created by cooking may need to be evaporated and concentrated. We suggest that the SAUTE/SEAR function should be used for approx 5-10 minutes depending on amount of liquids required to be reduced.

NOTE

Refer to cooking charts for cooking times.
OPERATING

your Breville Fast Slow Cooker™
A BEGINNER’S GUIDE TO SAUTÉ AND SEAR

SAUTÉING AND SEARING BEFORE PRESSURE COOKING & SLOW COOKING

Sautéing and Searing in Breville Fast Slow Cooker may take a little extra time and whilst not strictly necessary, the rewards are evident in the end result.

Sauté and Sear setting keeps the heat stable, browning meat and caramelising vegetables. This seals in the moisture, tenderises and intensifies the flavour.

Hint and Tips
- Trim all visible fat from meat or poultry.
- If a recipe calls for browning meat, it may be browned using SAUTÉ/SEAR setting.
- If after cooking the liquid quantity is excessive, remove the lid and operate Breville Fast Slow Cooker on SAUTÉ/SEAR setting for approximately 10-15 minutes or until the liquid reduces by the desired amount.

How to Sauté and Sear
1. Remove power cord, connect it to pressure cooker base and insert power cord to 230/240 volt power outlet. A single beep will sound and 0:0 will be displayed on LED display.

2. Click steam condensation collector into place.

3. Always ensure the lid is removed from pressure cooker before sautéing or searing.

5. Press TIMER button to increase time from 02 minutes to maximum 99 minutes. To fast advance time, press and hold TIMER button until desired time is displayed.
6. When desired cooking time is displayed, press START/CANCEL button. SAUTÉ/SEAR indicator light will stop flashing and will illuminate a solid red. The count down timer will commence. Allow Breville Fast Slow Cooker to heat with the lid off for approximately 2-3 minutes before cooking.

7. Add a small amount of oil or butter to removable cooking bowl.

8. Place food to be sautéed/seared into cooking bowl. Depending on quantity of food, meat searing may need to be done in batches.

9. When finished sautéing or searing, select PRESSURE COOK or SLOW COOK by pressing FUNCTION button. (Refer to pressure cook or slow cook ‘How to’ section on page 17-26 and page 29-31).

**IMPORTANT**

- SAUTÉ/SEAR function will not work if lid is sealed and locked in position. An audible alarm will sound. “E3” error code will appear on LED display to signal the need to unlock or remove the lid.

- Stir food in removable cooking bowl, using heat resistant spatula supplied.

- Do not use metal utensils because they will scratch non stick coating on the removable cooking bowl.

- Do not heat removable cooking bowl when empty for more than 10 minutes as it may damage the cooking surface.

- Caution should be used when searing meats and sautéing in hot oil. Keep hands and face away from the removable cooking bowl especially when adding new ingredients as hot oil may splatter.
Pressure cookers are back in the forefront again. These time savers are wonderful for cooking succulent roasts, flavoursome casseroles, delicious soups and even desserts in a fraction of the time and energy they take by conventional methods.

Pressure Cooking is a method of cooking food in a small amount of liquid with a gasket sealed lid that retains steam inside and builds pressure. It is the increase in pressure that raises temperature of the liquid and steam inside to well above boiling point and therefore allows food to be cooked up to 70% faster.

This means less energy is consumed and you will enjoy substantial savings in both time and cost. Because pressure cooked foods require very little cooking liquid, more vitamins, minerals, and other nutrients are retained and the natural flavours are enhanced.

How to Pressure Cook

1. Place removable cooking bowl into stainless steel base.

2. Attach clean silicone rubber gasket securely into gasket holder using the indicated arrows as a guide. Ensure that the arrows are facing up when inserting into the lid.

   **NOTE**

   Fit silicone rubber sealing gasket into lid if not already in place.

3. Place food to be cooked in a 1 litre (4 cups) minimum liquid into removable cooking bowl.
HOW TO PRESSURE COOK

4. Close and lock lid by using the handle. Close lid in a clockwise direction by aligning “ALIGN” arrows. The Lid arrow should align with stainless steel base arrow until it locks into place and is in the CLOSE position.

NOTE
This should be effortless!

5. Select one of the following settings using the Pressure Control dial located on the handle:
   - Low (Low Pressure)
   - Medium (Moderate Pressure)
   - High (High Pressure)

NOTE
Refer to Pressure Cooking guide and recipes on page 22-28 and page 44-63 and recipes.

6. Ensure Pressure Regulator Release Valve is turned to PRESSURE position.

The illustration above shows the correct Pressure Release Valve position.

You may need to adjust the Pressure Release Valve until it is in the correct position.

7. Press FUNCTION button until PRESSURE COOK indicator light flashes red.

8. To set TIMER; press TIMER button to increase cooking time. This will be illuminated on LED display from 02 minutes to maximum 99 minutes. To fast advance time, press and hold down TIMER button. When desired cooking time is displayed, press START/CANCEL button.

The function indicator light will stop flashing and will illuminate a solid red. Preheating will begin, control panel will continue to display selected cooking time. As selected pressure setting is achieved, there will be a slight hissing of steam from pressure regulator release valve. After approximately 10 minutes, or more depending on the amount of liquid added to cooking bowl, selected cooking time will begin to count down in minutes and this is shown on LED display.

9. When LED displays “0” cooking has finished. Breville Fast Slow Cooker will sound 5 beeps.
10. To release pressure from Pressure regulator release valve, press pressure release button until initial bursts of steam have been released. Then you may either continue to press the pressure release button or rotate the pressure release valve until all steam has been released and pressure indicator rod has dropped.

11. Wait 1 minute after releasing pressure to unlock and remove lid.

12. To open lid turn handle in a anti-clockwise direction until aligning “ALIGN” arrows to the OPEN position.

**NOTE**

This should be effortless!

13. Check food to see if it has been cooked sufficiently. If not, replace lid and lock into position following the previous steps.

**IMPORTANT:**

- Do not fill removable cooking bowl higher than MAX line marking on the inside of the cooking bowl.
- Do not exceed ⅓ mark line on the inside of the cooking bowl when pressure cooking foods that expand; for example, rice, dried beans, grains and legumes.

**WARNING:**

- The minimum amount of water to be added to removable cooking bowl for Pressure Cook recipes cooking in under 10 minutes is 1 litre (4 cups). Anything less might boil dry and pressure cook will not function. Additional liquid may need to be added during cooking.
- Never operate appliance when it is empty. Do not cook with food content below the lowest ⅓ mark line.
- Never use oil or milk as a cooking liquid such as deep frying or making custards. Only use hot/warm liquids particularly after sautéing to avoid any damage to the removable cooking bowl. Adding hot liquids also hastens the time to reach pressure.
- Keep hands and face clear of Pressure Release Valve when appliance is in Pressure Cooking operation. Hot steam and water may be emitted during use.
- When cooking under pressure, lid of the Breville Fast Slow Cooker can not be opened. Do not try to force the lid open.
- After making soups and stocks, allow several minutes before releasing pressure and removing lid to make sure that hot liquid inside will not boil over.

**WARNING:**

Use caution when opening the lid. Steam escapes as soon as the lid is opened. Never place your face or hands over Breville Fast Slow Cooker when removing the lid. Always use oven mitts when handling the hot removable cooking bowl.

### NOTE

Time will vary with individual recipes and according to nature of certain foods and quantities. If results are under cooked, close and lock lid, press FUNCTION button until PRESSURE COOK indicator light flashes red. Set the timer accordingly and press START/CANCEL button to rebuild pressure and cook for required time.

These cooking times are approximates only and times will vary according to nature of certain foods and quantities. If results are under cooked please refer to recipe section page 44-63 for recipes relating to these cooking charts.

**NOTE**

To avoid overcooking fish and seafood when using PRESSURE COOK function, it is generally a good idea to release steam and remove lid to stop cooking immediately. Remove fish or seafood and serve.

PRESSURE COOKING LEGUMES
Yields approximately 3-4 cups cooked legumes depending on type

INGREDIENTS
1 ½ cups dried beans or peas
3 cups boiling water for soaking
3 cups hot water for cooking

METHOD
1. Soak beans or peas in boiling water for a minimum of 3 hours. Drain and rinse well.
2. Add beans or peas and hot water to removable cooking bowl of Breville Fast Slow Cooker ensuring not to fill more than full. Secure lid on.
3. Press FUNCTION button and select PRESSURE COOK, indicator light will illuminate.
4. Enter TIME according to beans or peas used, time is displayed on LED.
5. Pressure Release Valve is to be turned to PRESSURE position and Pressure Control Dial turned to MEDIUM position.
6. Press START/CANCEL button.
7. Once timer is “0” and 5 beeps sound, release PRESSURE.
8. Open lid. Allow to cool then remove and drain beans or peas. Use as required as a substitute for canned beans or peas.

TIP
Cooking times recommended in chart are for legumes.
Where a recipe includes cooking of dried legumes with other ingredients, cooking time will need to be increased. As a guide, reduce conventional recipe cooking time by \( \frac{2}{3} \).

Breville Fast Slow Cooker has been designed specifically with a unique Slow Cook setting for flavour layering. A technique professional chefs use to enhance and deepen the taste of meals by using the same cooking bowl for sautéing onions and searing meats and creating casseroles, curries, soup, stock and bolognaise.

With Breville Fast Slow Cooker you can now sauté and slow cook in the cooker using the same non stick cooking bowl. Simply activate SAUTÉ/SEAR function to caramelise vegetables and sear meats and then start to SLOW COOK.

SLOW COOK setting on Breville Fast Slow Cooker will gently simmer food for an extended period of time.

The following is a guide to adjusting your favourite recipes:

**NOTE**

Refer to recipes page 44-63 this instruction book.
1. Place removable cooking bowl into stainless steel base.

2. Attach clean silicone rubber gasket securely into gasket holder using the indicated arrows as a guide. Ensure that the arrows are facing up when inserting into the lid.

**NOTE**
Fit silicone rubber sealing gasket into lid if not already in place.

3. Place food to be cooked and a minimum of 1 litre (4 cups) liquid into removable cooking bowl.

4. Close and lock lid by using handle. Close lid in an clockwise direction by aligning “ALIGN” arrows. Lid arrow should align with stainless steel base arrow until it locks into place and is in the CLOSE position.

**NOTE**
This should be effortless!
5. Press FUNCTION button until SLOW COOK indicator light flashes red.

6. To set TIMER; press TIMER button and choose either 6 hours or 8 hours, 6H or 8H this will illuminate on LED display. When desired cooking time is displayed, press START/CANCEL button. The function indicator light will stop flashing and will illuminate a solid red.

7. Preheating will begin, control panel will continue to display selected cooking time, and count down in hour increments until last hour and this hour will countdown in minutes on LED display.

8. When LED displays “0” cooking has finished. Breville Fast Slow Cooker will sound 5 beeps and will automatically switch to KEEP WARM setting for 30 minutes.

9. To open lid turn handle in an anticlockwise direction until aligning “ALIGN” arrows to OPEN position.

**NOTE**
Pressure release valve and control dial is not relevant when slow cooking.

**NOTE**
This should be effortless!

**IMPORTANT**
- Never use SLOW COOK setting without food and liquids in the removable cooking bowl.
- Always have lid closed throughout the operation of the SLOW COOK setting.
- Always use dry pot holders or oven mitts to remove cooking bowl when hot.
HOW TO POT ROAST

- Do not place removable cooking bowl or stainless steel lid when hot on any surface that may be affected by heat.
- Dishes can be prepared well in advance of mealtime.
- It is almost impossible to overcook using the SLOW COOKER setting.

WARNING
Always open stainless steel lid carefully and away from yourself to avoid scalding from escaping steam.

HOW TO POT ROAST

The addition of liquid is required for pot roasting. Place meat in cooking bowl, then add sufficient liquid a minimum 1 litre (4 cups) to cover up to a third of meat.

When using SLOW COOK or PRESSURE COOK settings meat will not brown during the pot roasting process, so for browner results seal on the SAUTE/SEAR setting first before pot roasting.

POT ROAST

Serves 4 to 6

INGREDIENTS

1-1.2kg boneless chuck roast
2 cloves garlic, peeled and chopped
1 Tablespoon vegetable oil
1 brown onion, peeled and chopped
125ml (½ cup) beef stock
1x140g can Italian tomato paste
1x400g can diced tomatoes in tomato juice
1 Tablespoon brown sugar, firmly packed
½ teaspoon dry mustard
¼ teaspoon paprika
2 Tablespoons lemon juice
2 Tablespoons cider vinegar
1 teaspoon Worcestershire sauce
2 Tablespoons chopped fresh parsley

METHOD

Rub meat all over with crushed garlic.

Sauté Setting

1. Press FUNCTION button then select SAUTÉ, ensure indicator light illuminates. Enter 15 minutes TIME, time is displayed on LED. Press START/CANCEL button and wait 3 minutes while bowl is heating before cooking.

2. Add meat and brown well on all sides. Remove meat and set aside.

3. Heat oil for 20 seconds and add onions, sauté for 2-3 minutes until onions have softened.

4. Add beef stock, tomato paste, diced tomatoes and juice, brown sugar, dry mustard, paprika, lemon juice, cider vinegar and Worcestershire sauce.

5. Stir well until all ingredients are well mixed and bring mixture to the boil.

6. Return meat to Breville Fast Slow Cooker and turn to coat all over with sauce. Secure the lid on.
HOW TO ROAST

Pressure Cook Setting

7. Press FUNCTION button then select PRESSURE COOK, indicator light will illuminate.
8. Enter 45 minutes TIME, time is displayed on LED.
9. Pressure Release Valve is to be turned to PRESSURE position and Pressure Control Dial turned to HIGH position.
10. Press START/CANCEL button. Once full pressure is reached, change Pressure Control Dial to MEDIUM.
11. Once timer is “0” and 5 beeps sound, release PRESSURE.
12. Open lid. Check beef, it should be soft when pierced with a knife. Remove meat and slice and return to Breville Fast Slow Cooker for 10 minutes before serving.

Using SLOW COOK Setting

The addition of liquid may be required if you are using SLOW COOK setting for roasting. Elevate the meat to be cooked on provided stainless steel trivet.

NOTE

If you would like to slow cook this recipe follow the SLOW COOK instructions on page 29-31 and set for 6 or 8 hours.

HOW TO ROAST

Roasting meats using either PRESSURE COOK or SLOW COOK settings, creates tender, flavoursome results. Both cooking processes break down and soften the connective and muscle tissue within the meat, making it easier to slice.

Meat will not be browned during PRESSURE COOK or SLOW COOK settings, so for seared results use the SAUTÉ/SEAR setting first.

Using the PRESSURE COOK setting

The PRESSURE COOK setting is not recommended for dry roasting as liquid is always required. Elevate the meat to be cooked on the provided stainless steel trivet. Add a minimum of 1 litre (4 cups) hot liquid (water or stock).

The stainless steel trivet rack will keep the meat, raised above the boiling liquid.
**NOTE**

Do not use oil or milk as a liquid.

**TIP**

The SLOW COOK or PRESSURE COOK functions will stop operating or timer function stops counting down if insufficient liquid. Add more liquid, make sure at all times a minimum 1 litre (4 cups) liquid is in cooking bowl during cooking.

**SUITABLE MEAT CUTS FOR ROASTING**

- **Beef**: Blade, Rump, Rib Roast, Fresh Silverside, Topside.
- **Lamb**: Leg, Mid Loin, Rack, Crown Roast, Shank, Shoulder, Mini Roasts.
- **Veal**: Leg, Loin, Rack, Shoulder/Forequarter.
- **Pork**: Loin, Neck, Leg, Racks (remove skin & fat).

**BASIC ROAST**

**INGREDIENTS**

1-1.2 kg beef, veal, lamb or pork roast or whole 1.2kg chicken
4 cups (1 litre) hot beef or chicken stock

**METHOD**

**Sauté Setting**

1. Press FUNCTION button then select SAUTE, indicator light will illuminate.
2. Enter 10 minutes TIME, time is displayed on LED.

3. Press START/CANCEL button and wait 3 minutes while bowl is heating before cooking. Add meat and brown well on all sides. Remove meat and set aside. Add beef stock or chicken stock and mix with spatula. Carefully place trivet into the bowl. Place meat onto trivet. Secure lid on.

**Pressure Cook Setting**

4. Press FUNCTION button and select PRESSURE COOK, ensure indicator light illuminates.
5. Enter 13 minutes for rare or 15-18 minutes for medium to well done TIME, time is displayed on LED.
6. Pressure Release Valve is turned to PRESSURE position and Pressure Control Dial turned to HIGH position.
7. Press START/CANCEL button. When pressure is reached, turn Pressure Control Dial to LOW position.
8. Once timer is “0” and 5 beeps sound, release PRESSURE.
9. Open the lid. Rest meat on a plate, covered with alfoil for 10 minutes before carving. Season to taste and serve.

**NOTE**

If you would like to slow cook this recipe follow the slow cook instructions on page 29-31 and set for 6 or 8 hours.
HOW TO STEAM

1. Place stainless steel trivet inside removable cooking bowl and add 1 litre (4 cups) of hot liquid (water or stock). Place stainless steel steaming basket containing food onto trivet using handle.

NOTE
You may add more food on top of and around basket, but do not exceed the 2/3 MAX line on the cooking bowl.

2. Close and lock lid by using handle. Close lid in a clockwise direction by aligning “ALIGN” arrows. Lid arrow should align with stainless steel base arrow until it locks into place and is in the CLOSE position.

NOTE
This should be effortless!

3. Select one of the following settings using the Pressure Regulator Control dial located on the handle:
   - Low (Low Pressure)
   - Medium (Moderate Pressure)
   - High (High Pressure)

4. Ensure Pressure Release Valve is turned to PRESSURE position.

NOTE
Refer to a Beginner’s Guide to Pressure Cooking and recipes for specific settings. (page 19-28)

5. Press FUNCTION button until PRESSURE COOK indicator light flashes red.

6. To set TIMER; press TIMER button to increase the cooking time this will be illuminated on LED display from 02 minutes to maximum 99 minutes. To fast advance time, press and hold down TIMER button. When desired cooking time is displayed, press START/CANCEL button. The function indicator light will stop flashing and will illuminate a solid red. Preheating will begin, control panel will continue to display selected cooking time. As selected pressure setting is achieved, there will be a slight hissing of steam from pressure release valve.
HOW TO STEAM

After approximately 10 minutes, or more depending on the amount of liquid added to cooking bowl, selected cooking time will begin to count down in minutes and this is shown on LED display.

7. When LED displays “0” cooking has finished. Breville Fast Slow Cooker will sound 5 beeps.

8. To release pressure from Pressure release valve; press pressure release button. Steam can be released in the following two ways:

10. Check food to see if it has been cooked sufficiently. If not, replace lid and lock into position following the previous step 4.
HOW TO STEAM

⚠️ CAUTION

• When steaming the lid cannot be opened. Do not try to force the lid open.

• Use Caution when opening lid. Steam escapes as soon as the lid is opened. Never place hands and face over Breville Fast Slow Cooker when removing the lid. Always use oven mitts when handling the hot removable cooking bowl.

Basic Steamed Vegetables
Select vegetable from basic steaming chart. 1 litre hot water or stock.

Place trivet into removable cooking bowl of Breville Fast Slow Cooker and pour in 1 litre hot water or stock. Place steaming basket of vegetables onto trivet. Secure lid on.

STEAM in Breville Fast Slow Cooker
1. Press FUNCTION button then select STEAM, indicator light will illuminate.
2. Enter recommended TIME for selected vegetable, time will be displayed on LED.
3. Pressure Release Valve is turned to PRESSURE position and Pressure Control Dial turned to LOW position.
4. Press START/CANCEL button. Once timer is “0” and 5 beeps sound, release PRESSURE.
5. Open lid.
To avoid overcooking foods when using the STEAM function, it is generally a good idea to release steam and remove lid to stop cooking immediately. Remove the steaming basket by the handles.

Using the Keep Warm Function

**NOTE**

**Automatically** – after slow cooking has finished, keep warm will function for 30 minutes.

**Manual** – select keep warm function and time can be programmed from 02 to 99 minutes.
CARE AND CLEANING

your Breville Fast Slow Cooker™
1. Before cleaning Breville Fast Slow Cooker, switch off at power outlet, unplug from power outlet and remove the connector end of power cord from appliance inlet.

2. Wash removable cooking bowl with warm soapy water and a clean soft cloth or sponge. Rinse with clean water and dry thoroughly.

3. Stainless steel base can be wiped over with a soft, damp cloth and then dried thoroughly.

4. Remove condensation collector by gently pulling downwards and clean it thoroughly under water. Place it back in its original position.

5. Remove and disassemble lid.
   a) First, gently pull the silicone rubber gasket out from under the gasket holder. Check periodically that it is clean, flexible and not cracked or torn. If damaged do not use the appliance.

   **NOTE**
   Removable cooking bowl can be washed in dishwasher. However, to maintain non-stick coating, it is recommended to wash cooking bowl in hot, soapy water using a mild household detergent. Rinse and dry thoroughly. Do not use abrasive cleaners, steel wool, or scouring pads as these can damage the surfaces and non-stick coating.
CARE AND CLEANING

⚠️ WARNING

• Do not use abrasive cleaners, steel wool or scouring pads.
• Do not immerse metal base or power cord in water or any other liquid as they may cause electrocution.
• Ensure removable cooking bowl is correctly positioned in the base before you commence cooking.

NOTE

After cooking rice or large meals, some cooking liquid may pool under lid at the top of appliance around the cooking bowl. This is normal. Use a paper towel or kitchen cloth to clean after every use. Use a small brush or cotton swab if necessary.

Call The Breville Customer Service Centre. Phone: 1300 139 798 to order a replacement.

NOTE

Replace silicone rubber gasket every 1-2 years (see your nearest Breville Service Centre).

b) To remove gasket holder, turn the holder so that the plastic tabs are not touching the lugs on the lid.

NOTE

There are 6 triangular metal cut out grips around the inside of the lid that keep the holder in place.

Wash gasket and holder in warm, soapy water. Rinse with clean water, dry thoroughly and place back in their original position.

NOTE

The silicone rubber gasket and holder can be washed in the top rack of a dishwasher to eliminate odour from spices.

NOTE

Soak silicone rubber gasket in a mixture of bicarbonate soda and water to help eliminate odours before cleaning.

NOTE

During cleaning of the lid ensure Pressure Indicator Rod moves freely (up and down). Wash and clean any oil or food residue from this area.
CARE AND CLEANING

⚠️ IMPORTANT

The silicone rubber gasket must always be properly positioned with the wide bottom into the underside of the lid. If the gasket is not assembled properly, The Breville Fast Slow Cooker Plus will not operate. An alarm will sound and the error “EO” will be displayed on the LCD screen.

- **c)** Wash the inside of the lid with a wet, soapy sponge or cloth. Use a brush to remove oil residue if necessary. Wipe dry with a clean, damp cloth.

- **d)** Regularly inspect that Pressure Release Valve Cover is clean and free of liquid/food. Remove pressure release valve cover from the lid (by twisting and lifting up and off the Lid) and wipe over with a soapy cloth and dry clean. Rinse well and replace by clipping back in place.

- **e)** Pressure Safety Valve will need to be regularly checked and cleaned in order to avoid any clogging which could result in blocking the safety valve.

To clean the Pressure Safety Valve, push valve from inside the lid in and out with a long thin object (e.g. chopstick, screwdriver). Wash and clean any oil or food residue. Ensure the valve moves in and out smoothly after cleaning.

⚠️ IMPORTANT

All lid parts must be reassembled correctly to ensure safety as well as optimal performance of your Fast Slow Cooker.

**NOTE**

A mixture of 1 Tablespoon vanilla, ½ cup lemon juice, 1 Tablespoon lemon rind plus 500ml hot water, cook at HIGH pressure for 5 minutes. Leave to slow release pressure, then disassemble and wash as directed, can help eliminate food odours.
