

NESPRESSO COFFEE MACHINE EN720M

NESPRESSO®

PATENTED SYSTEM FOR CAPPUCCINO AND LATTE

De'Longhi patented IFD System: to obtain delicious "cappuccino", "latte" or hot milk. Press the cleaning button and the machine will perform an automatic washing cycle. After use, the milk flask can be placed directly into the fridge

NESPRESSO-SYSTEM

NESPRESSO has developed a unique worldwide extraction system which involves a three phase process. The first involves inserting the capsules into the front compartment. This is then followed by the automatic perforation of the capsule by three blades within the compartment. The final phase involves high-pressure extraction producing a fantastic cup of coffee with a rich crema.

- High-performing 19-bar pressure pump
- Thermo block heating system
- De'Longhi patented IFD System, to obtain real cappuccino, latte and hot milk automatically into the cup or glass
- The milk jug (0.46L) can be placed in the fridge, after use
- "Empty tank" indicator
- "Full capsule container" indicator
- Illuminated keys and automatic controls, to choose your favorite drink (cappuccino, latte, espresso, long black, hot milk or hot water) in a simple and intuitive way
- All drinks may be personalized and memorized, by varying the quantity of milk and of coffee
- Adjustable drip tray, to allow use of both coffee cups and glasses for espresso and cappuccino
- Cup warmer tray on top of the machine
- Easy insertion of capsules
- Automatic ejection of used capsules
- Removable water reservoir (1.2L)
- Eco-Timer
- Metal structure
