

Lennox window units

Affordable climate control you'll feel comfortable with

The Lennox window unit (heat pump) air conditioner makes a noticeable difference to your living comfort and wallet. A convenient and cost competitive alternative to high wall splits and heat pumps, the Lennox window unit (heat pump) air conditioner is fast and easy to install in window and wall areas.

Your bedroom, lounge room, study or home office will feel cool in summer and cosy in winter, without heating up your energy bills.

The Lennox window unit (heat pump) air conditioner is also ideal for small commercial venues like retail shops, small offices, on-site work sheds and school office buildings, where ducted air conditioning or split systems are not practical. It's easy on the eye and budget, and provides year-round climate control at the touch of a button.

Lennox window units

Easy on the eye and budget
