

MONOLITH GLEM

The Natural Choice

Performance Innovation Design

Celebrating 50 years of
cutting-edge design and
innovation

Celebrating 50 years of cutting-edge design and innovation, Glem Gas has released a new range of state-of-the-art Italian cookers that brings the world of restaurant excellence into the home. The glamorous new Glem Monolith Series of upright cookers has been designed to make a statement in the home, bringing functionality and style to the kitchen.

The three new wide format cookers, with large capacity ovens, offer home cooks a wide range of features that equal those of professional kitchens.

Originating in Modena, Italy - the historic town that has brought us Ferrari and Lamborghini cars, as well as balsamic vinegar - the Monolith Series has been built with characteristic Italian flair and the latest in manufacturing technology. Furthermore, as the only 100% factory-owned Italian cooking appliance company in the country, Australians can be assured that a Glem cooker is supported by the original manufacturer.

Intended to provide home cooks with more control over their culinary results, the 90cm wide cookers with 116 litre oven capacity, offer a wide range of cooking options. These include:

- Continuous side panels - provide a solid base for installation and allow for height adjustment range to match bench of 890 - 910 cm.
- Full glass inner door - easy to wipe clean.
- Triple glass panels - for a cool touch outer door and removable for cleaning.
- Touch control digital programmer - gives full control over cooking times.
- High performance gas cooktops - flush cast iron trivets and five burners that provide full width cooking with centre triple ring wok burner. Also with the added security of flame failure safety valves.
- Single hand operation electronic ignition.
- Choice of multifunction electric oven or the exclusive Bi EnergySelect oven where either gas or electricity can be selected from the one oven.
- Closed door electric grilling.
- Stainless steel design with storage compartment.

BI ENERGY SELECT 70/90/100

Freestanding Cookers • Gas hob/Bi Energy Select oven

ML96GGESI - 90cm

ML106GGESI - 100cm

ML76GGESIB, ML96GGESI, ML106GGESI

The EnergySelect cookers are the ultimate chef's appliance with the efficiency and environmental benefits of gas combined with the convenience and ease of electricity. Developed by Glem Gas in Australia, these unique cookers offer home cooks the choice of baking using electricity or gas.

The best of both worlds, the moist heat of gas retains the moisture when roasting meat and the dry heat of electricity bakes perfect crisp pastries.

The Bi EnergySelect cookers are part of the Glem mygreenoven programme which highlights the environmental benefits of cooking with gas.

PROFESSIONISTA 90

ML96PROEI • 90cm Freestanding Cooker • Gas hob/electric oven

ML96PROEI

The Glem Professionista is the perfect dual fuel cooker combination of an easy to use multifunction electric oven with gas cooktop. The centre triple ring wok burner provides ample space to cook substantial family meals with large pans or woks along with smaller burners which can be used for simmering and lower-heat cooking tasks.

A full six-function electric oven with considerable capacity and closed door grilling perfectly complements the large cooktop area for big family meals.

CERAMICA 90

ML96ECI • 90cm Freestanding Cooker

ML96ECI

The Glem Ceramica 90 cooker is a perfect solution for anyone looking for an alternative to gas.

The cooktop has clearly identifiable cooking zones that can be extended to accommodate larger pans. The cooktop also features residual heat indicators that will remain lit until the

cooktop is cool enough to touch. The easy wipe cooktop surface, flush against kitchen bench surfaces, is ideal for capitalising on valuable kitchen space.

The eight-function electric oven is highly flexible, suiting a variety of requirements.
