Once started, the door cannot be opened for safety reasons.

Do not use methylated spirits, solvents or similar products.

Important:

- Cleaning the dispenser drawer
  - Unplug the drain hose from the pump filter
  - Remove any recess with an old drawer
  - Turn the filter using a strap turning it clockwise.
  - After cleaning, refit soap without laundry or have finished.

Installation of drain hose

- CAUTION about location and moving the power cord from physical or mechanical abuse, such as being twisted, kinked, pinched, squashed in a jamb of a door, or obstructed by carpeting if the washing machine is installed on a carpeted floor. In countries where there is a risk of cockroach contamination or infestation, a bag (85 x 60 cm) covered with aluminum foil on the side facing the cooker or stove, must be inserted between the two appliances.

- This equipment is not designed for maritime use or for use in mobile installations such as caravans, aircraft etc. Turn off the electricity unless this practice is specifically recommended by the manufacturer of the fabric softener or product.

- We recommend connecting most appliances to a dedicated circuit which is protected by a mains fuse. That is, a single outlet not impeded by carpets, rug etc.

- Every other use is improper and may lead to injuries, whereby the liability of the manufacturer will cease.

- CAUTION about the power cord
  - Plese ensure that when the washing machine is installed, that a Service Technician can gain easy access in the event of a breakdown.

- CAUTION about positioning the appliance
  - The washer experienced a power plug and call for service.
  - Over load in motor.
  - Water level sensor has malfunctioned.
  - The appliance has an unbalance detection
  - The drain filter is clogged.
  - The filter of the inlet hose(s) are clogged.
  - Water supply is not adequate in area
  - The water pressure is too low.

- Electrical connection

- Cleaning and Maintenance

- Do not allow the feet of the washing machine to get wet. If feet of the washing machine get wet, slipping may occur.

- The machine must be positioned so that the plug is easily accessible.

- There may be a danger of scalding.

- Intended use: This appliance has been designed exclusively for use in dry-interior households. It has not been designed for use in mobile installations such as caravans, aircraft etc. Turn off the electricity unless this practice is specifically recommended by the manufacturer of the fabric softener or product.

- Foam rubber materials can, when heated, produce fire by spontaneous combustion.
